

fact-checking the Earth!

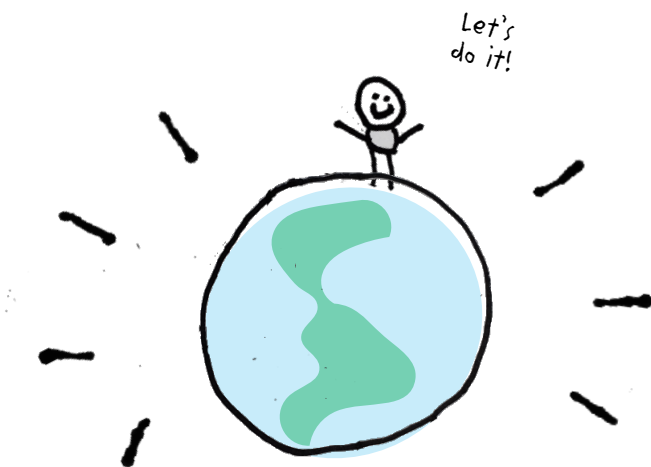

What will you find in this book?

- ☐ Unbiased Facts! FACT
- ☐ Dreadful doubts?
- ☐ New perspectives! ❤

$$d = \sqrt{a \times R \times h}$$

Claire Obscure

Fact-checking the Earth!

Written and illustrated by
Claire Obscure

$d=3,67h$

To all the
freethinkers
of this plane

Thank you for
shaking my ground.

Caution!

This book is not designed
for bedtime story, as it
may cause wakefulness.

I can't
sleep!

Hello, my fellow open
minded Earthlings!

It is now time to...

Test your knowledge
while improving your...

- ☐ Logic!
- ☐ Intuition?
- ☐ Mood!

"We are rotating at 1 000 mi/h,
faster than the speed of sound,
and yet we don't feel any of it."

Isn't that...

- ☐ Amazing!
- ☐ A lie?
- ☐ An amazing lie!

"We stick upside down
to a rotating ball
because of gravity."

Isn't that...

- ☐ Exciting!
- ☐ Upside down thinking?
- ☐ Total nonsense!

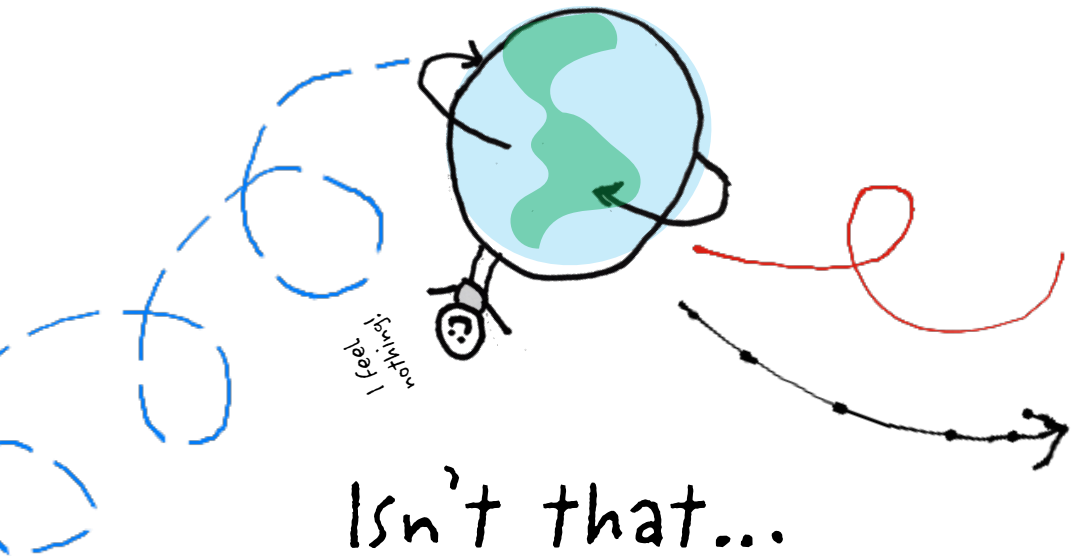

"We are rotating at 1 000 mi/h
(faster than the speed of sound),

freefalling around the sun
at 60 000 mi/h,

moving around the galaxy
at 500 000 mi/h,

while moving outward in an expanding universe
at a 1 000 000 mi/h,

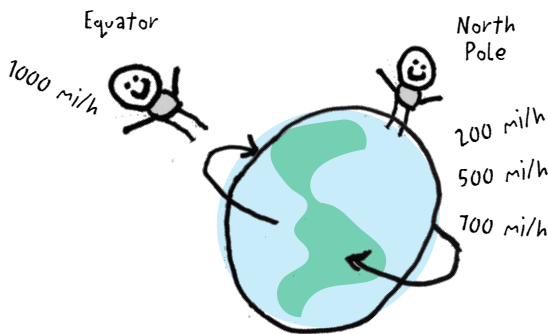

all at once,
and yet we don't feel a bit of it."

Isn't that...

- ☐ Astounding!
- ☐ A monstrous numbness?
- ☐ An gigantic deception!

Centrifugal force VARIES according
to the speed of rotation where
you are on the globe.

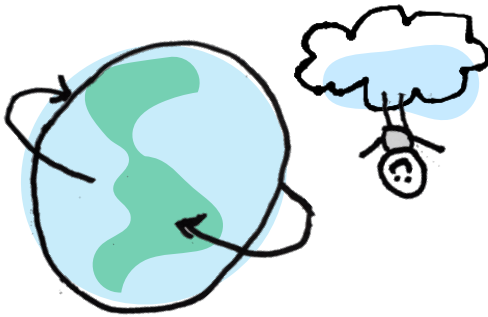

Yet your weight doesn't vary,
no matter where you stand on earth.

Isn't that...

- ☐ Dazzling!
- ☐ A good observation?
- ☐ An inconvenient truth!

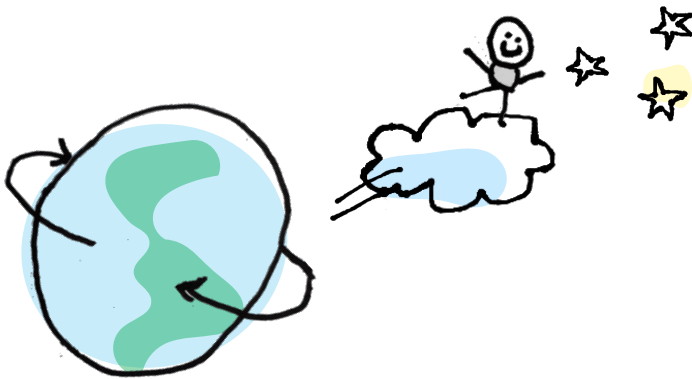

Gravity hold tons of water in place on a spinning ball, yet doesn't attract clouds to earth.

Isn't that...

- ☐ A Good News!
- ☐ Weird stuff?
- ☐ Scientifically suspect!

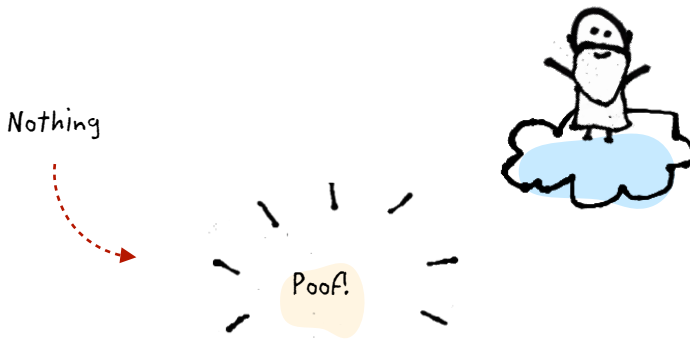

There is no barrier between earth
and space, yet clouds never fly off.

Isn't that...

- ☐ Relevant!
- ☐ Strange?
- ☐ Scientifically impossible!

"God is silly magic."
"The Universe came from nothing."
say the experts.

Isn't that...

- ☐ What everybody thinks!
- ☐ Time to pause?
- ☐ Time to sit back and reflect!

The scientists explain:

"There was nothing and then nothing magically exploded for no reason, creating everything and then a bunch of everything magically rearranged itself for no reason what so ever into self-replicating bits which then turned into dinosaurs."

$0 + 0 = 0$

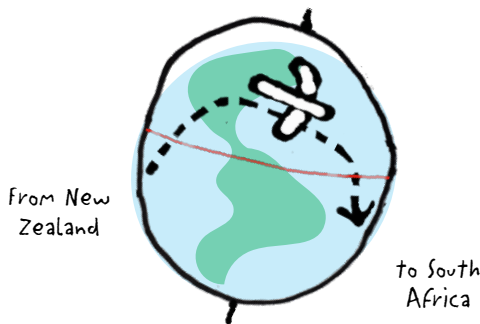

Isn't that...

- ☐ Makes perfect sense!
- ☐ Questionable?
- ☐ Pure ridicule!

$(0+0)^n = \text{dino}$

Instead of going directly to their destination in a straight line, flight routes in Southern Hemisphere always take a long detour via the northern hemisphere.

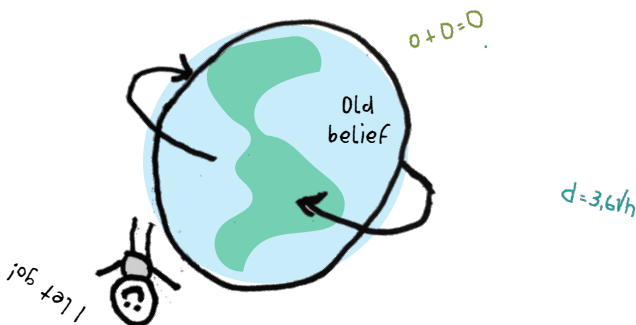

Isn't that...

- ☐ Because the pilot knows better than me!
- ☐ A waste of fuel?
- ☐ Another good clue!

"If you find from your own experience that something is a fact and it contradicts what some authority has written down, then you must abandon the authority and base your reasoning on your own findings."

Leonardo Da Vinci

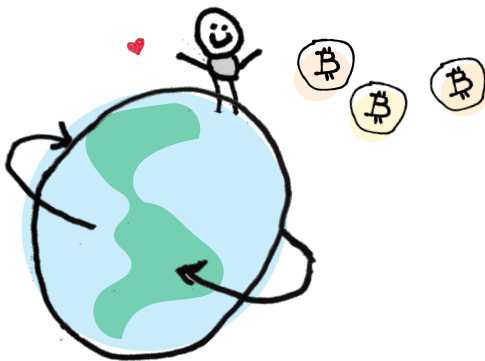

Isn't that...

$$d = (2 \times R \times h)$$

- ☐ Great to follow orders!
- ☐ Time to let go of old beliefs?
- ☐ A beautiful quote!

"I offer 3 Bitcoin for ONE globe proof."
says David Weiss since many years.

Isn't that...

- ☐ A scam!
- ☐ A genuine offer?
- ☐ Another proof of the globe lie!

"I refuse to discuss with the proponents of geocentrism." says Neil deGrasse Tyson.

Isn't that...

- ☐ A renowned astrophysicist!
- ☐ Unscientific?
- ☐ A well paid clown!

$$0+0=0$$

"I wonder what government
say about geocentrism."

$$d=3,6/h$$

Isn't that...

- ☐ Important!
- ☐ Irrelevant?
- ☐ Hilarious!

"I wonder if I should
investigate geocentrism."

$$d = \frac{1}{2} \pi R^2 h$$

Isn't that...

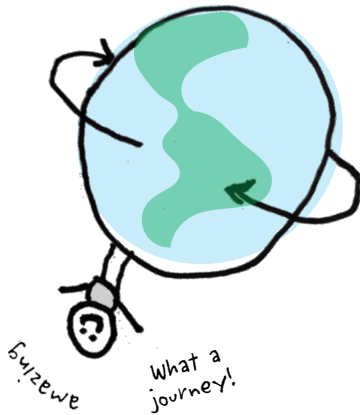

- ☐ Dangerous!
- ☐ Exciting?
- ☐ Time!

And finally...

(Drum roll please)

For those of us that have
discovered fascinating things
about our home...

Isn't it time to...

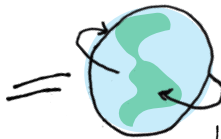

- ☐ Go back to sleep!
- ☐ Breathe?
- ☐ Share the good news!

The end .

Special thanks to David Weiss
for his tireless and inspiring work.

flatearthisdave.com

Adios!

Is this my
last round?

For the young at heart,
a surprising little book
designed to create a thriving
peaceful joyous world.

Nothing less.
